CERTIFICATE OF ANALYSIS

#EM08	EXTRACTME DNA GEL-OUT KIT

Batch Number:	656572
Expiry Date:	09.11.2019

Shipping conditions:	RT
Specification:	The EXTRACTME DNA GEL-OUT kit is designed for the rapid and efficient
	purification of DNA fragments directly from agarose gels (standard and
	low-melting point agarose gels run in either a TAE or TBE buffer).
	Agarose, ethidium bromide and other contaminants from a sample are
	effectively removed in the purification process. The kit enables the
	purification of DNA fragments from 50 bp to 30 kb, as well as plasmid
	and genomic DNA. However purification of fragments smaller than 100
	bp and larger than 10 kb will result in decreased recovery rates. The
	purified DNA can be used in common downstream applications. The
	purification protocol and buffer formulations were optomized for high
	yields and DNA purity. The product in intended for research use only.

QUALITY CONTROL

The quality of each production batch (LOT) of the EXTRACTIME DNA GEL-OUT kit is tested using standard QC procedures. The purified DNA concentration and quality are evaluated by gel electrophoresis.
